The Octonauts: Explore the Great Big Ocean

After a long descent, the Octonauts reached the bottom of the ocean to visit their **DEEP SEA** research lab. The crew inspected the camera network but they didn't see any Vegimals, only the flickering lights of bioluminescent jellyfish.

Tunip gazed out at the smoky hydrothermal vents and felt like he was on a different planet. He wondered if he'd ever find his own habitat.

The Gups

◀ **GUP-A:** The Octonauts' main sub for exploration and travel; suitable for all environments; mimics the design of an anglerfish. Has camouflage capabilities.

▶ **GUP-B:** This speedy sub is Kwazii's choice vehicle for racing dolphins (or getting anywhere fast) and is equipped with a "turbo button" for extra quickness in an emergency. Has been known to crash. A lot.

◀ **GUP-C:** This tug-sub has the sea-horse power to tow an Orca Whale; useful for all heavy transport. Mimics the design of a blue whale.

▶ **GUP-D:** Tweak's favorite multi-purpose machine. She's constantly creating new front-end attachments for this ship. Has two modes: Crab and Manta Ray.

◀ **GUP-E:** Quick and lithe manoeuvrability for exploration, scouting, and fish first-aid emergencies. Can transform from research vessel into Peso's ambulance. Mimics the design of a guppy.

CREATURE REPORT

Every 10-minute episode of The Octonauts is followed by a 1--minute “Creature Report” – a musical segment where the crew reviews 3 to 4 Octo-facts about a featured creature covered in that episode in a fun and informative way. The segment always begins the same way, with footage of Captain Barnacles calling the entire crew together: then throws to a monitor where new VO & reuse footage from the episode is used to reinforce the facts.

Ocean Exploration and Research

OCTONAUTS CORNER

The NOAA Office of Ocean Exploration and Research is the only U.S. federal organization dedicated to exploring our unknown ocean. The Octonauts are a team of quirky and courageous undersea adventurers with the mission to explore new underwater worlds, rescue amazing sea creatures, and protect the ocean.

Now, the NOAA Office of Ocean Exploration and Research and the Octonauts have teamed up to bring you even more great deep-ocean information, to help you learn about and protect our ocean. Happy exploring!

Want to learn more about the sea animals that the Octonauts rescue in their shows? Check out "NOAA and the Octonauts," a new podcast from NOAA Education that dives into the science behind the show's featured creatures. Find it on NOAA.gov or on your favorite podcast platform.

As you follow an expedition and watch the dives live, are you curious how NOAA Ship Okeanos Explorer is involved in making these operations possible? Ever wondered how we are able to stay at sea for three weeks at a time? Want an exclusive peek inside the ship's control room? Then join us for a tour of NOAA Ship Okeanos Explorer with Silvergate Media, Inc. and the NOAA Office of Ocean Exploration and Research. [Download larger version \(mp4, 201.2 MB\).](#)

NOAA/OCTONAUTS CREATURE CARDS

Learn more about animals that live in the deep ocean with these NOAA/Octonauts Creature Cards! Ask a grown up to help you print your favorites to color and collect.

ANGLERFISH

Anglerfish live all over the world, deep in the ocean where it is always dark. [Learn more!](#)

- [Video of an anglerfish from the Pacific Ocean](#)

VENT SHRIMP

In the deep ocean, hydrothermal vents are often oases of life, with bacteria at the vents serving as a main source of food for other animals – like vent shrimp. [Learn more!](#)

- [Video about life at hydrothermal vents](#)

BRITTLE STAR

Brittle stars are found all over the world, mostly in the deep ocean. [Learn more!](#)

- [Video of a brittle star from the Pacific Ocean](#)

JELLYFISH

Jellyfish are not actually fish – they have no backbone and are actually related to corals and anemones! [Learn more!](#)
